\*NOTE: There are 6,704 distinct patient adverse events reported in VAERS from the state of Maryland through 6/4/2021, many of which met more than one report criteria. Therefore there are 7,397 instances totaled in this report, but each distinct row includes only distinct patient reports (no duplicates) and percentages are calculated as a percent of total database reports. For instance, if a patient visited the ER, was admitted to the hospital, and died, that's one adverse event and three instances on the report.
