***NOTE:** There are 3,165 distinct adverse carditis events following Covid-19 vaccination reported in VAERS through 7/30/2021. Numerous patients met multiple criteria; therefore this report displays 5,104 instances of medical outcomes among patient reports citing the criteria above. But each value displayed on this report includes only distinct patient records (no duplicates) and percentages are calculated as a percent of total patient reports received. For instance, if a patient visited the ER, was hospitalized, and died, that patient's record would populate three instances in three categories on this report.
