***NOTE:** There are 16,643 distinct adverse events following Covid-19 vaccination of children under 18 reported in VAERS through 7/30/2021. Numerous patients met multiple criteria; therefore there are 17,669 total instances of those children's medical outcomes displayed in this report. But each value displayed on this report includes only distinct patient records (no duplicates) and percentages are calculated as a percent of total patient reports received. For instance, if a patient visited the ER, was hospitalized, and died, that patient's record would populate three instances in three categories on this report.
