**\*NOTE:** There are 1,648,913 distinct reports captured in VAERS, and 818,044 distinct Covid-19 reports captured, through 10/15/2021. Numerous patients met multiple criteria; therefore there are 1,797,680 total instances of medical outcomes following vaccination displayed in this report, and 905,287 instances of medical outcomes following Covid-19 vaccination. But each value displayed on this report includes only distinct patient records (no duplicates) and percentages are calculated as a percent of total patient reports received. For instance, if a patient visited the ER, was hospitalized, and died, that patient's record would populate three instances in three categories on this report.

**\*\* Please note that Event Category values changed between the initial version of the VAERS database and the current version; therefore the values in the reporting categories "Emergency Room" and "Office Visit" are not comparable across Covid-19 Vaccine reports and other reports captured prior to the database change. Combining the three reporting categories provides an apples-to-apples comparison of Covid-19 reported events and all other reported events.**
